For God and Country

My dear Friends,

Hope you all are keeping fine. I won't forget you in my life, for all your kindness, your love, prayers and your support. Because you are such a lovely and grateful friends. I am sincerely grateful to you.

Here covid is spreading very fast. Now government planned to keep symptomless patients in their own house, if there is room and attached bathroom facilities, because there is no place to accommodate them. But not implemented in Idukki district. Anyway changing the situation every now and then.

Next problematic patients are dialysis patients. One dialysis patient's daughter is covid positive and patient became first contact. He has to do dialysis. We have only one unit. The patient was crying because they have to go 60 kilometers from here to do dialysis. After seeing his pitiful condition, we have taken him at 11 pm in night for dialysis. In our hospital two technicians taken the responsibility and done dialysis b using PPE kit. Then fumigated all the unit. After three days again to do the same.

Changing the situation we also would like to change our plan. Instead of buying an ambulance, we can buy dialysis machine if possible. That is in great necessity. This is the real situation and this condition may continue till December or more than that. God only knows. We assure our prayers. I have taken the opportunity to thank each every member of Hilfe Adimaly Group.

Have a nice day. Let me conclude.

With prayer and gratitude

Sr Lincy CSN
